The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 43-58 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are vague and indefinite. The phraseology used in independent claims 43 and 51 "each resonant frequency being within a range of frequencies associated with that resonant frequency" is unclear in that it is not defined now understood what how or why a range of frequencies" are associated with "that" (or any particular) "resonant frequency". In other words what defines what range of frequencies is associated with a resonant frequency? Without further explanation, one cannot determine the metes and bounds of these claims.

Due to the indeterminate nature of these claims, prior art cannot be applied at this time.

Cited of interest are Puskas.
